SURFACES FOR LIFE

LAMURA[®]

SURFACES FOR LIFE

Each Lamura worktop, breakfast bar and island unit has a modern radiused edge to the top and bottom of the profile.

Welcome to a choice of
20mm and 40mm thicknesses
for your laminate worktops,
breakfast bars and island units.

Welcome to colour matched
laminate splashbacks and upstands.

And welcome to great sustainable
design and Great British craftsmanship.

WELCOME TO THE LAMURA COLLECTION

LAMURA®

EASY TO CLEAN,
HYGIENIC SURFACES NOT
ONLY FOR YOUR KITCHEN
AND UTILITY ROOM...

...BUT ALSO FOR YOUR
BEDROOM AND BATHROOM

The bedroom window sill, dressing table top, bedside cabinet tops and drawer unit top are 20mm Grey Lined Oak.

The bathroom vanity bowl surface and cistern cover is 20mm Antalya Marble. Lamura 20mm has a moisture resistant core which makes it a great choice for bathroom surfaces. As with all surfaces, water spillages should be wiped dry when you have finished using the bathroom.

LAMURA[®]

DESIGNED AND MANUFACTURED WITH CARE, NATURALLY

What defines a great work surface? Durability? Appearance? How easy it is to clean? All are important of course, but for us it's also about creating impactful designs that cause minimum impact on the environment.

It's why we're proud to say that all the timber used for the manufacturing of Lamura comes from well managed and sustainable forests. And prouder still to have earned accreditations from both the Forest Stewardship Council and the Programme for the Endorsement of Forest Certification.

And, all Lamura components undergo rigorous testing to ensure they deliver superior performance against heat, water, abrasion and impact resistance.* This attention to detail has given Lamura the ultimate mark of quality – the FIRA Gold Award.

*Whilst Lamura offers additional performance over other worksurfaces, standard precautions such as heat protectors and chopping boards should still be used.

LAMURA[®]

A DEEP-ROOTED APPRECIATION

No material has played a more important role in human civilisation than wood. So it's hardly surprising its natural beauty continues to hold a long-lasting appeal for so many.

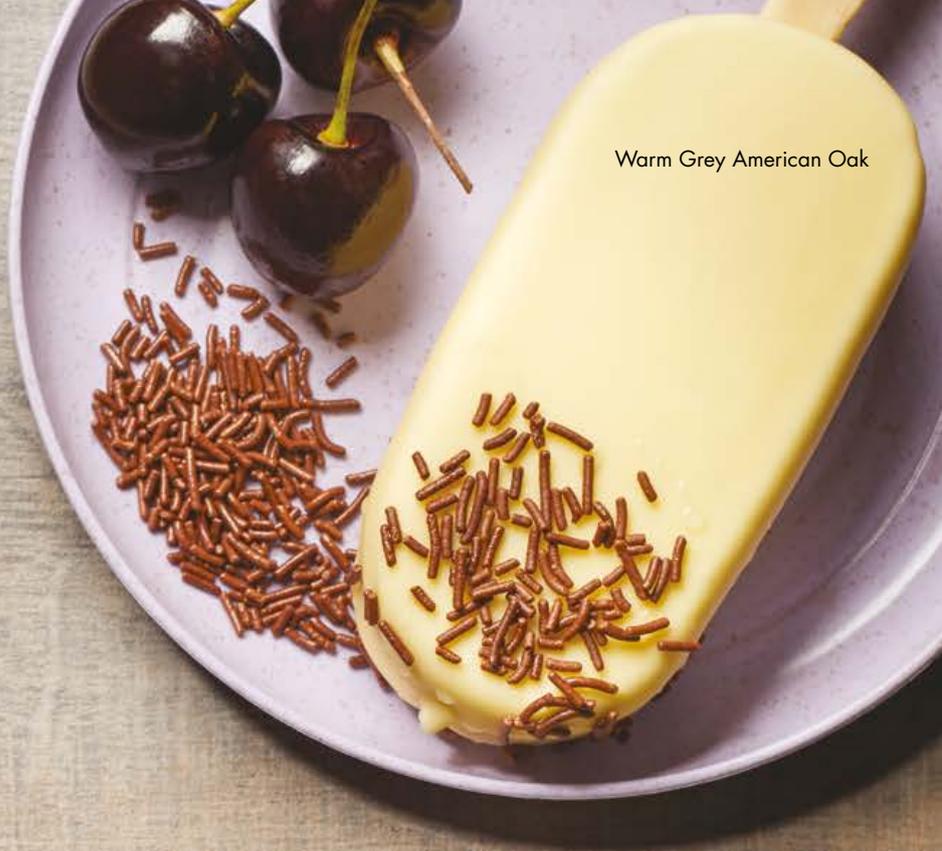

The Lamura wood collection includes a choice of seven distinctive oaks, ranging from the understated elegance of Natural Oak to the striking reclaimed look of Medium Grey Oak. Whichever décor you choose, you can be confident it will offer the same hardwearing versatility that's ingrained in every Lamura surface.

MARVEL AT MARBLE

There's a reason marble's appeal remains timeless. After all, it's a finish that screams quality without ever having to shout. No small feat.

A choice of seven marble-effect décors is available, including the ever popular Carrera and Calacatta. Both designs hail from the Tuscany region of Italy and feature the classic cloud-like veins so synonymous with marble.

Should you wish to break a little with tradition, perhaps turn your attention to the more exotic Black, Gold and Grey veined marbles. Whichever finish you choose, you can be confident the effect will look marvellous for years to come.

SLATED FOR SUCCESS

There's a reason slate's now commonly used for everything from coasters and jewellery to a posh place to plonk your fish and chips. It's because it evokes a real sense of warmth and strength.

Along with the subtle grey colours of natural slate, this Lamura slate-effect décor has a texture that looks and feels just like the real thing. A perfect example of bringing innovation to imitation.

THE GLORY OF GRANITE

Each of the granite-effect décors included in the Lamura collection feature bright reflective particles that playfully catch the light from every angle.

Black, Grey and White Sirius

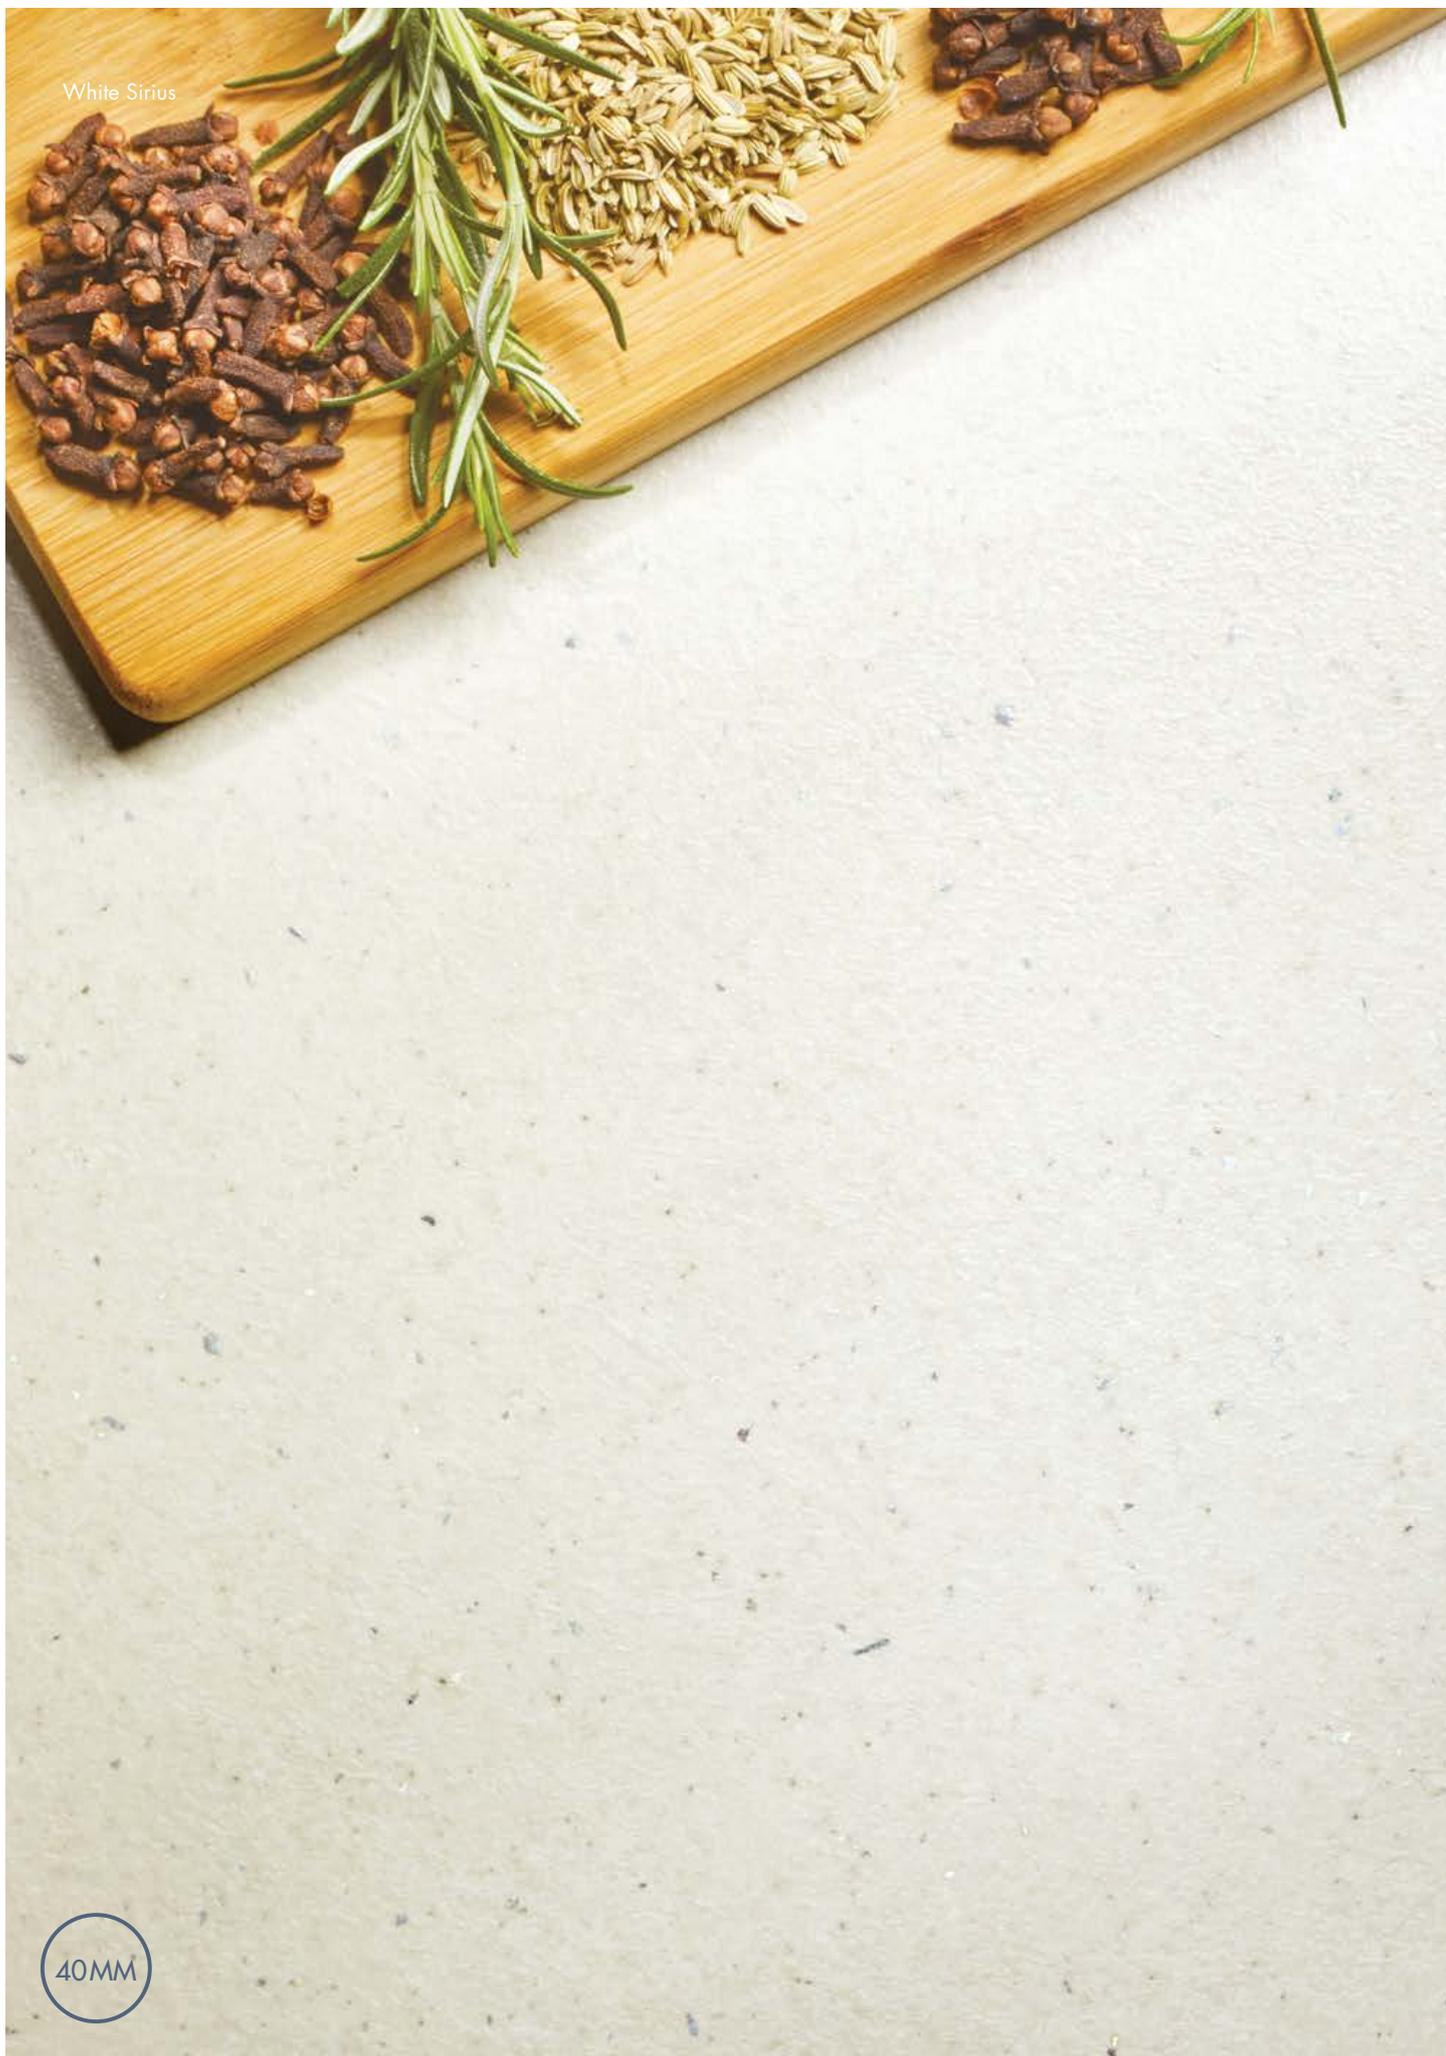

These décors have a deep surface texture called Quarry, which provides a highly practical and hardwearing surface that's ideal for today's hardworking kitchens.

Mica Granite and White Andromeda

These sophisticated décors have a high gloss finish called Quartz* which further enhances the playful way light reflects off the surface. It really is quite mesmerising.

*Please note: The high gloss finish of quartz is more susceptible to scuffs and scratches than the other Lamura textures, so additional care needs to be taken when using these surfaces.

CONCRETE BENEFITS

When you think of concrete you naturally think of strength. After all, it's been the material of choice in construction for almost 200 years. Here at Lamura, we think of it as beautifully practical, too.

Why beautifully practical? Simple.

The naturally weathered and textured appearance of concrete is ideal for a kitchen environment where everyday scuffs and even scratches come with the territory. And the subtle grey colours of concrete remain on-trend for contemporary living spaces throughout the home.

Natural Concrete

LAMURA[®]

IN AWE OF IRON

Iron ore is a natural stone from which metallic iron is extracted and from which steel is manufactured.

It is one of the building blocks of modern architecture and construction.

Before iron ore is processed, the effects of oxidation bring out the dark grays, blues and rusty reds of this stone.

These complex colours have been beautifully recreated within Weathered Iron Ore.

The Lamura quarry texture adds both a brilliance to the colours of this authentic décor and a durable surface for you to work on.

Weathered Iron Ore

LAMURA[®]

THE MAGIC TOUCH

Worktops are designed to be used day in, day out, which is why the way they feel often holds as much importance as appearance. With this in mind, we've created six distinctive textures that sensitively enhance our wide choice of décors.

Sync

This texture is synchronised with the shapes and colours of White Veined Marble and our slate décor, resulting in a remarkably accurate representation of these beautiful stones.

Matt

Used with Weathered Concrete, Sunset Concrete and several of our marble décors, this delicate texture provides a distinctly natural look and feel.

Wood

We have applied this texture to all our woodgrain décors because it subtly and ingeniously replicates the natural grain of real wood.

Quarry

A hardwearing texture that contains multicoloured elements that shine like crystals in granite. Quarry is the texture of choice for our three Sirius décors and Weathered Iron Ore.

Quartz*

A gloss surface with multicoloured metallic elements freely distributed within the décor to produce a dazzling and unique finish.

Impression

Before it is set hard, concrete is poured into a 'former' which creates the finished dimensions and shape of the set concrete. The former is often made of rough-cut timber and the texture of that timber former leaves an impression on the set concrete. Lamura's unique Impression texture carefully replicates the look and feel of this type of concrete.

And it works brilliantly with Natural Concrete.

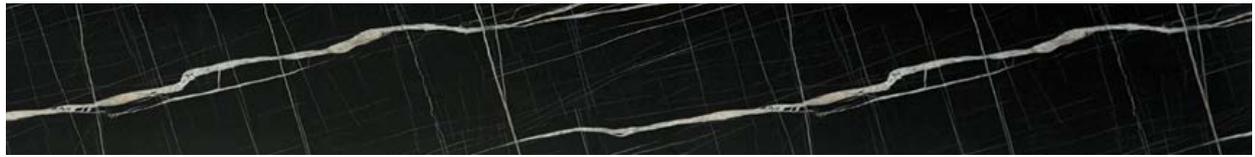

*Please note: The high gloss finish of quartz is more susceptible to scuffs and scratches than the other Lamura textures, so additional care needs to be taken when using these surfaces.
